Use-Case Specification

Use Case ID

UC-02

Use Case Name

Generate FEFO Dispensing List

Primary Actor

Pharmacy Clerk

Preconditions

1. The Pharmacy Clerk has access to the system.
2. Medicine batch records are available in the inventory.
3. Each batch contains quantity and expiry-date information.

Trigger

The Pharmacy Clerk requests a dispensing list for a selected medicine.

Main Success Scenario

1. The Pharmacy Clerk selects Generate FEFO Dispensing List.
2. The system displays an option to select or search for a medicine.
3. The Pharmacy Clerk selects the required medicine.
4. The system retrieves all batches associated with the selected medicine.
5. The system validates batch availability and expiry status.
6. The system excludes expired batches and batches with zero available quantity.
7. The system sorts the remaining valid batches in ascending order of expiry date.
8. The system prioritizes the batch with the nearest expiry date.
9. The system generates the FEFO dispensing list.
10. The system displays the prioritized list to the Pharmacy Clerk.
11. The Pharmacy Clerk uses the list to select the appropriate batch for dispensing.
12. The use case ends successfully.

Alternate Flow — AF-01: No Valid Batch Available

Condition: No non-expired batch with available quantity exists.

1. During validation, the system determines that no valid batch is available.
2. The system does not generate a FEFO dispensing list.
3. The system displays a message indicating that no valid batch is available for dispensing.
4. The system records the medicine for inventory review.
5. The use case ends.
